CAREER OBJECTIVE

Aspiring technology professional with a strong interest in hardware system development, Full-Stack Development, and UI/UX Design. Passionate about designing innovative, user-focused, and efficient solutions by integrating hardware and software technologies. Seeking an opportunity to apply my technical skills, creativity, and problem-solving abilities while contributing to organizational success and continuously enhancing my professional expertise.

EDUCATION

Bachelor of Engineering in Computer Science and Design , Kongu Engineering College CGPA:7.00	2023 – 2027
HSC , Ponnu Matric Hr. Sec. School Percentage: 73%	2022 – 2023
SSLC , RKR Grks Matric Hr. Sec. School Percentage:73%	2020 – 2021

TECHNICAL SKILLS

Programming Languages: C, Python, SQL

Frontend: HTML, CSS, Figma, Framer

Backend: Node.js, Express.js

Database: MySQL, MongoDB, Supabase

Tools & IDEs: Visual Studio Code Git, GitHub

PROJECTS

Smart Healthcare Hardware System (Hardware)

- Designed and developed a smart healthcare hardware system with automatic and remote-controlled operation.
- Enabled real-time monitoring and control to improve safety, reliability, and ease of use.
- Integrated fire detection and response functionality to help identify fire hazards and enhance emergency safety.
- Built a practical hardware solution focused on efficient operation, user convenience, and healthcare support.

Direct Farmer To Customer Trading Platform (Full Stack)

- Developed a full-stack marketplace connecting farmers directly with consumers, eliminating intermediaries and improving market accessibility.
- Implemented secure user authentication, online payment integration, product management, and order tracking features.
- Designed an intelligent platform with crop price prediction and demand forecasting to support informed decision-making.
- Built a responsive and user-friendly interface to enhance the buying and selling experience for both farmers and customers.

AREAS OF INTEREST

UX/UI Design

Full-Stack Development

Hardware Project Development
